SCHEDULE

Scope of the certification:

Functional Safety Capability of the Management of Functional Safety to:

- Undertake IEC 61508-1 clause 8: Functional Safety Assessment;
- Undertake, and verification of, IEC 61508-1 phases 3, 4, 5 and 9: (Hazard and risk analysis; Overall safety requirements and allocation; System safety requirements specification);
- In addition to the above, verification of elements as per IEC 61508-2 clauses 7.4.2, 7.4.3, 7.4.4 and 7.4.5 (Systematic capability, Hardware safety integrity, Architectural Constraints, and Requirements for quantifying the effect of random hardware failures)

General Information and Conditions of Certification

1. This certificate is based on Sira Test & Certification Assessment Reports R70197610B.
2. This certificate does not support assessment within the framework of IEC/ISO 17065.
3. Revisions to procedures that could have a significant impact on safety shall be reviewed by Sira before their application.
4. The certified company shall maintain its management of functional safety and associated procedures to the required standards which will be monitored and re-assessed by Sira.
5. If the management of functional safety and associated procedures are found not to comply, Sira Certification Service should be notified immediately at the address shown on this certificate.
6. This certificate will remain valid subject to completion of one surveillance audit within the three-year certification cycle, and upon receipt of acceptable response to any findings raised during this period. This certificate can be withdrawn if the certified company no longer satisfies scheme requirements.
7. The use of this Certificate and the Sira Certification Mark are subject to the 'Regulations Applicable to the Holders of Sira Certificates' and the 'Supplementary Regulations Specific to Functional Safety Certification'.
8. This document remains the property of Sira and shall be returned at the request of the issuer.
